LEGNA

COMPOSITE DECKING

95% Recycled Materials

Investment in your Home

Environmentally Responsible Design

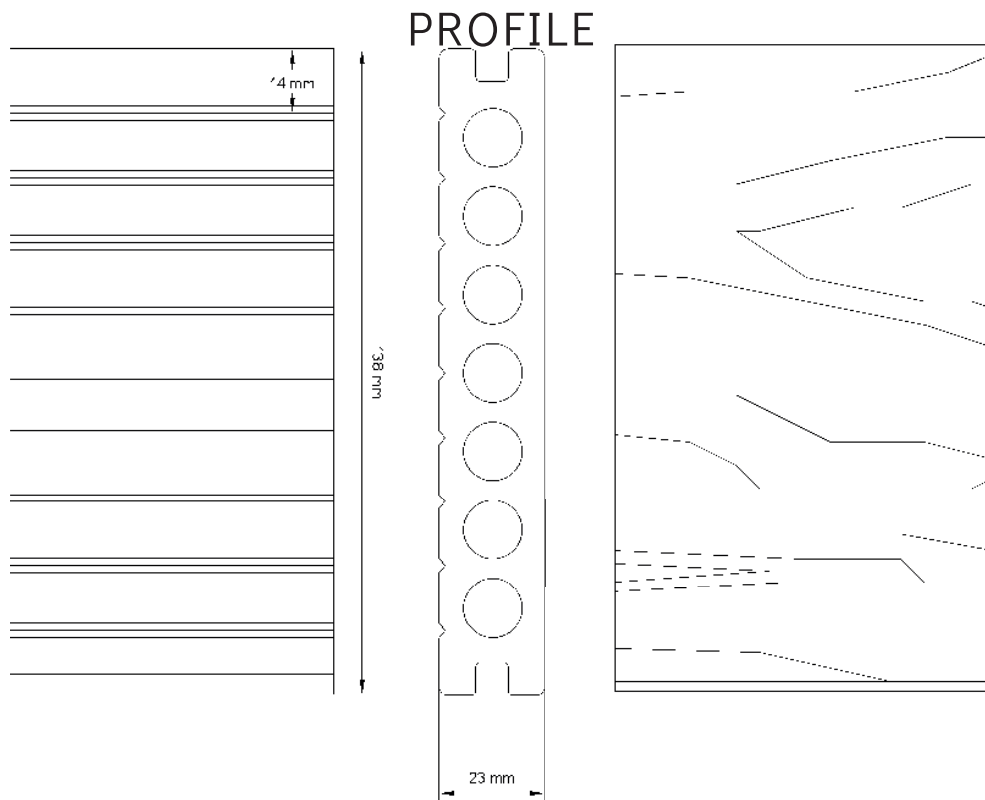

Extensive Warranty

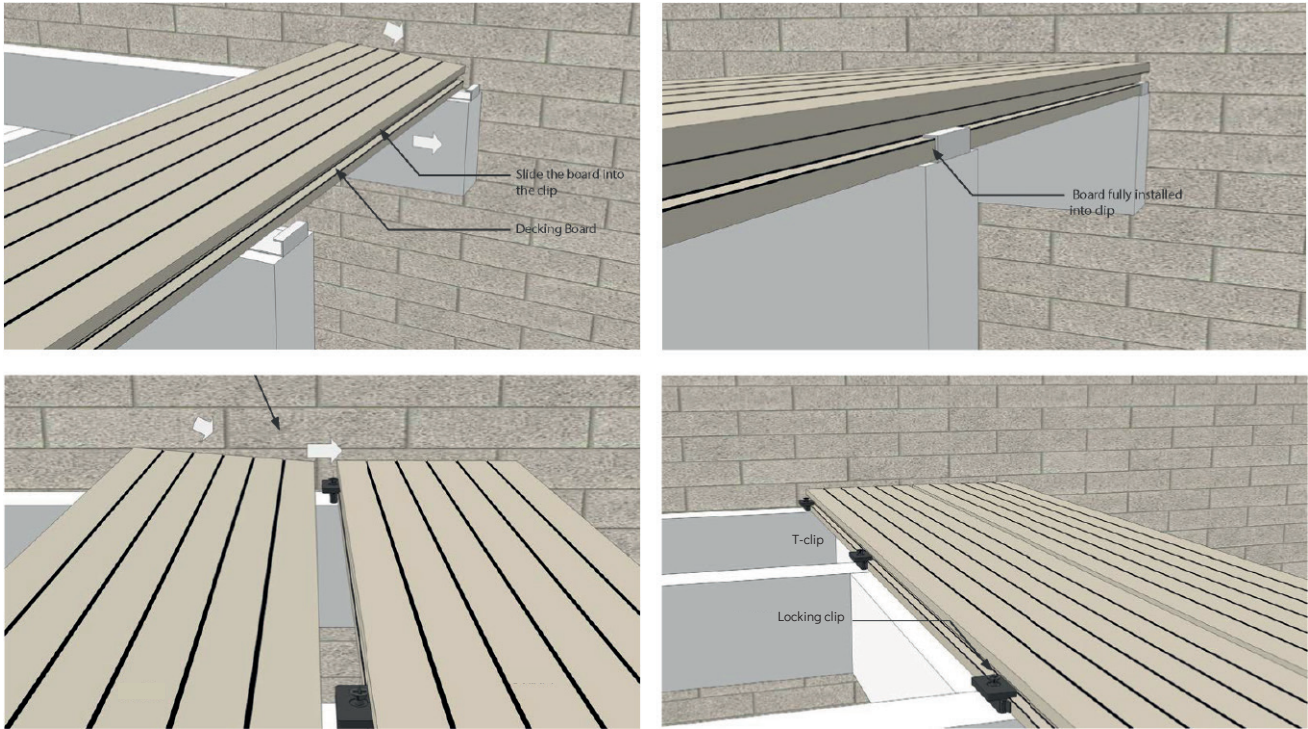

Legna composite decking has a textured deep grain, perfectly imitating natural timber grain an ideal replacement for labour-some timber decking.

Ensuring environmentally conscious design Legna boards are made from 95% reclaimed hardwood fibres and recycled HDPE plastic which combine to create a high quality synthetic material engineered to be low maintenance long lasting and extremely durable. We are confident Legna composite decking ensures quality and aesthetic but also by far outperforms traditional treated timber.

FIXING SYSTEM

Please refer to installation guides for expansion tables, it is very important to adhere to expansion and contraction guidance when installing composite materials.

Legna decking boards are 23mm x 138mm x 3600mm and are installed with a 5mm hidden fixing t-clip. Once installed with the t-clip the coverage of the board is 143mm. To calculate boards per sqm;

$$138\text{mm} + 5\text{mm (clip)} = 143\text{mm} \quad \frac{1000\text{mm}}{143\text{mm}} = 6.99 \text{ board widths} \quad \frac{6.99}{3.6\text{m}} = 1.95 \text{ Boards per SQM}$$

The t-clip system allows boards to move freely with expansion and contraction preventing any buckling twisting or warping. This clip is also conveniently hidden in the grooves of the decking board so there are no visible fixings through the tops of the deck. Start clips are a single sided fixing used to secure the first and last boards.

KEY COMPONENTS

Legna Deck Board

23 x 138 x 3600mm

Legna Flat Trim

15 x 150 x 3600mm

Angle Trim

42 x 42 x 2900mm

T-Clip

Box of 250
Includes screws & bit
Coverage - 15 SQM

Locking Clip

For controlling expansion
in a particular direction.
See installation guide
for more information.

Start/Finish Clip

One every 400mm on
starting & finishing edges

COLOURS AND FINISHES

The Legna range is available in 3 different colours and has a textured deep wood grain finish on one side and traditional decking grooves on the reverse.
